

Healthcare Consultation Report

Date: 02-16-2025

Doctor Name: Dr. Megan Blake

Specialty: Dentist

Patient Information:

Patient Name: Winny Pooh

Patient ID: WP-16888

Consultation Summary:

Subjective:

Winny Pooh presented for a routine dental check-up, reporting mild sensitivity to cold in the lower left molar region for the past two weeks. No history of recent trauma or dental procedures. No significant medical history reported. No known allergies.

Objective:

- Extraoral exam: No swelling or lymphadenopathy.
- Intraoral exam: Good oral hygiene overall.
- Noted a small occlusal carious lesion on tooth #19 (lower left first molar).
- No gingival inflammation or bleeding on probing.
- Bite and jaw movement within normal limits.

Assessment:

- Early dental caries on tooth #19.
- Mild dentin hypersensitivity.

Plan:

- Recommend composite restoration (filling) for tooth #19.
- Desensitizing toothpaste advised for sensitivity.
- Reinforce oral hygiene instructions, especially flossing in the molar region.
- Schedule follow-up in six months for routine exam and cleaning, or sooner if symptoms worsen.
